

Sustainability Analyst

(Amsterdam, Fulltime/parttime)

Key responsibilities:

- Professionalise ESG data collection processes (linking relevant systems) and ensuring better data completeness, robustness, and accuracy
- End-to-end coordination of GHG emissions data collection, analysis, and reporting
- Perform data analysis on current ESG performance and identify key opportunities for improvement
- Formulate concrete actions to accelerate ESG outcomes
- Follow up with Asset Managers that actions are properly embedded in asset-level plans
- Contribute to Sustainability departments' action list
- Contribute to sharpening of Impact reporting framework

Key performance indicators:

- Tracking and reporting of GHG emissions on quarterly and annual basis
- Demonstrable increase in ESG data completeness, robustness and accuracy
- Quality of analytical insight and recommendations to asset teams

Who we are looking for:

- Academic background
- 0-3 years working experience in a similar job
- "Green heart"
- Strong analytical skills: ability to 'connect the dots'
- Self-starter; high energy; proactive approach, a real 'do-er'
- Strong communication
- Willingness to contribute to company goals in broadest sense
- Practical and pragmatic
- Fluency in English and Dutch (spoken and written)
- Good working skills with MS Office applications such as Word, Excel and PowerPoint

Working relationships:

- Head of Sustainability
- Sustainable Development Manager
- Fund Financial Controllers
- Portfolio Directors
- Asset Managers
- Corporate Services (e.g. Group Control, IT, HR, GRC)

If you are interested in this position, we look forward to receiving your application.
